

sgapiQuestionsAnsweredOnPage(%page

This function returns a count of answered questions on a given page. Use %options to specify question type. %page should be the page sku/ID (not the page number).

Possible Values for %options*

RANK (Evaluates Drag & Drop and Table Rank questions)

RADIO (Evaluates Multiple Choice and Likert Scale questions)

CHECKBOX (Evaluates Checkbox questions)

TEXTBOX (Evaluates all Short Text questions, including number, email, percent, date)

MULTI_TEXTBOX (Evaluates List of Textboxes)

TABLE (Evaluates List of Dropdown Menus, Star Ranking, Multiple Choice Table, Table of Checkboxes, Table of Textboxes and Table of Dropdown Menus)

GROUP (Evaluates Custom Group and Contact Group questions)

MENU (Evaluates Dropdown Menu questions)

MENU (Evaluates Dropdown Menu questions)

MENU (Evaluates Dropdown Menu questions)

CONT_SUM (Evaluates Continuous Sum Questions)

%options values can be specified as a comma separated string.

Examples

In this example, we flag the survey as 'Complete' if at least 4 of the radio and checkbox questions on the first page have been answered.

```
%options = "RADIO,CHECKBOX";
%numberAnswered = sgapiQuestionsAnsweredOnPage(1,%options);
if (%numberAnswered >= 4) sgapiSubmitSurveyComplete();
```

In this example, we output each of the question types for %options.

```
%radio = sgapiQuestionsAnsweredOnPage(1,'RADIO');
%rank = sgapiQuestionsAnsweredOnPage(1,'RANK');
%checkbox = sgapiQuestionsAnsweredOnPage(1,'CHECKBOX');
%textbox = sgapiQuestionsAnsweredOnPage(1,'TEXTBOX');
%multi = sgapiQuestionsAnsweredOnPage(1,'MULTI_TEXTBOX');
%table = sgapiQuestionsAnsweredOnPage(1,'TABLE');
%group = sgapiQuestionsAnsweredOnPage(1,'GROUP');
%menu = sgapiQuestionsAnsweredOnPage(1,'MENU');
%contsum = sgapiQuestionsAnsweredOnPage(1,'CONT_SUM');

%output .= 'RADIO: ' . %radio;
%output .= 'RANK: ' . %rank;
%output .= 'CHECKBOX: ' . %checkbox;
%output .= 'TEXTBOX: ' . %textbox;
%output .= 'MULTI_TEXTBOX: ' . %multi;
%output .= 'TABLE: ' . %table;
%output .= 'GROUP: ' . %group;
%output .= 'MENU: ' . %menu;
%output .= 'CONT_SUM: ' . %contsum;
```
