

# sgapiFullChop(%%string)

Last Modified on 01/30/2015 4:31 pm EST

This function runs both the PHP [rtrim](#) and [ltrim](#) functions on the given value and returns the results. This will remove all preceding and trailing whitespace.

## Example

The below example will output the following: Text to Leftall this whitespaceText to Right

```
%% string = '    all this whitespace    ';  
%%output .= 'Text to Left'.sgapiFullChop(%%string).'Text to Right';
```
