

sgapiArrayGet(%%array,%%index)

Last Modified on 08/06/2014 1:22 pm EDT

Returns the value of the given index in an array.

Example

In this example we pull the value for a particular row (10010) from a list of textboxes where we are collecting favorite movie by genre.

```
%%movies = sgapiGetValue(20);  
%%foreign = 10010;  
sgapiArrayGet(%%movies,%%foreign);
```
