

sgapiGetRespondentSessionID()

Last Modified on 08/06/2014 1:22 pm EDT

This function returns the session ID for the current response. Session ID is a unique, randomly generated string used to identify the respondent's survey session.

Example

```
%%session = sgapiGetRespondentSessionID();  
  
%%output .= %%session;
```

The output would be: 1390787383_52e5bb3756bd96.14308931
