

sgapiGetPipeValues(%%questionID)

Last Modified on 08/06/2014 1:22 pm EDT

This function returns an array the piped values for the given question-piped question.

Example

In the below example we output the values of question ID 6 which is negative question piped from a question on a previous page.

[Check it out in an Example Survey](#)

```
%%output .= sgapiPrint_R(sgapiGetPipeValues(6));
```

The output would be: Array ([0] => Negative piping [1] => Pipe from a URL Variable)
