Example

The below script will send a response confirmation to the respondent. The script is run and the email is sent when the page is displayed. Logic can be set up with in the script or on the logic tab within the application to conditionally run the action and send the email.

```
%%to = sgapiGetValue(7);
%%toName = sgapiGetValue(1);
%%textBody = '';
%%bcc = '';
%%htmlBody = "Thank you for completing the survey. Your response is appreciate
d
We will be in touch shortly!.

 Thanks,
Your Company";

sgapiEmailSend(%%to, %%toname, "your.company@company.com", "Your Company", "Yo
ur Assessment Results", %%textBody, %%htmlBody, %%bcc, %%to, "html");
```
