Email Campaigns & Actions

These functions manage your email contact lists, create email content and trigger send email actions.

sgapAddContactToInvite - This function adds the given contact to the given invite.

sgapiRemoveContactFromInvite - This function removes the given contact from the given invite.

sgapAddContactToList - This function adds or updates a contact to the given contact list (as opposed to an email campaign).

sgapiRemoveContactFromList - This function removes a contact from a Contact List.

sgapiSetHTMLEmail / sgapiSetTEXTEmail - These functions sets either the HTML or TEXT content of a send email action.

sgapiEmailSend - This function constructs and sends an email at the runtime of your custom script.
