

## sgapiKSort(%%array, %%flag)

*Last Modified on 01/30/2015 4:31 pm EST*

This is equivalent to the [ksort](#) function in PHP. This function sorts an array by key. In this case, key is the answer option SKU. Elements will be arranged sequentially when this function has completed.

The %%flag parameter defaults to "SORT\_REGULAR". See the PHP documentation to learn more about %%flag options.
