

sgapiGetPagePipedAnswers

Last Modified on 08/06/2014 1:22 pm EDT

This function returns an array of the piped values for the given page-piped question.

Example

In the below example, we output the values of question ID 8 which is page-piped from a question on a previous page.

[Check it out in an Example Survey](#)

```
%%output .= sgapiPrint_R(sgapiGetPagePipedAnswers(8));
```

The output would be: Array ([0] => No [1] => Yes)
